

## **MULLINS, Steve**

I live and work in Bunjil. I want my kids to know that local democracy is about our community. That means a community-led council who listens to, advocates for and cares about the whole community; protects our Green Wedge Shire from the threat of encroachment; and offers far greater transparency and accountability to our community. I was shocked to learn Council spent hundreds of thousands of dollars on an unnecessary review of the Green Wedge Management Plan. I witnessed the secretive way Council privatised kerbside waste collection. Too many Council resolutions have been closed to the public. This undermines community trust in Council. Respect, accountability and transparency are fundamental to rebuilding trust. I have years of governance and management experience, overseeing millions of dollars in grants, and will prioritise good financial management and governance, but the mark of a good councillor is their preparedness to listen to our community. As your local councillor, I will foster community through sporting clubs and volunteer groups and by supporting local producers, artists, small businesses, fire brigades and the vulnerable and elderly. I will strive to protect township character, the natural environment and agriculture in our Green Wedge Shire and to create secure, local jobs. These four years are crucial for our Shire. The pressure of encroaching development is increasing. I hope you will join me in uniting and bringing community back to our council.
